

FIKIRU DEMLEW

Junior Software Developer | Frontend & AI Enthusiast

+251974155283 · fikrudemlew@gmail.com · fikrudemlew.vercel.app · github.com/FikruDemlew · [LinkedIn](#) · Addis Ababa, Ethiopia

PROFILE

Graduated Mechatronics Engineering student at Addis Ababa Science and Technology University with hands-on experience in full-stack web development and machine learning. Proven track record delivering real-world projects — from leading a 5-member GDSC team to building a CNN-based AI sorter using transfer learning. Passionate about writing clean, maintainable code and continuously expanding expertise across modern technologies.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, C++
Frontend	React, Next.js, Vue 3, HTML5, CSS3, Tailwind CSS
Backend / DB	Node.js, Firebase, PostgreSQL, REST APIs
Machine Learning	TensorFlow / Keras, CNN, Transfer Learning (MobileNetV2)
Tools & Practices	Git, GitHub, Responsive Design, Component-Based Architecture
Soft Skills	Team leadership, Communication, Problem-solving, Adaptability

PROJECTS & EXPERIENCE

Frontend Developer & Team Leader (5 members) | [Google Developer Student Clubs \(GDSC\)](#) 2022 – 2023

Movie Watchlist Platform

- Led end-to-end development of a web platform aggregating new and trending movies globally from concept through deployment.
- Implemented real-time search and a personalised user watchlist backed by Firebase authentication and Firestore.
- Managed project workflow, sprint planning, and code reviews for a 5-member cross-functional team.

Tech Stack: *HTML · CSS · JavaScript · React · Firebase*

Delivery App — Frontend

- Collaborated in a 9-member team to build a production-ready, responsive delivery app interface.
- Developed key UI components ensuring mobile-first UX and smooth integration with a Go backend via REST APIs.

Tech Stack: *React · Tailwind CSS · JavaScript · PostgreSQL · Go*

Personal Project | [Self-Directed](#)

2024

YouTube Clone

- [Built a fully functional YouTube clone featuring video browsing, search, and category filtering using the YouTube Data API v3.](#)
- Implemented responsive layout mirroring YouTube's design with dynamic data fetching and state management in React.

- [Deployed live to Netlify — view at youtubeclone1994.netlify.app](#)

Tech Stack: *React · Tailwind CSS · YouTube Data API v3 · Netlify*

Machine Learning Project | [Self-Directed](#)

2024

Tomato Sorting AI — CNN with Transfer Learning

- Designed and trained a Convolutional Neural Network (CNN) using MobileNetV2 transfer learning to classify and sort tomatoes by quality grade.
- Applied fine-tuning techniques to adapt the pre-trained MobileNetV2 backbone to custom tomato dataset, achieving high classification accuracy.
- Gained practical experience in dataset preparation, augmentation, model evaluation, and deployment of image classification pipelines.

Tech Stack: *Python · TensorFlow · Keras · MobileNetV2 · CNN · Transfer Learning*

Self-Learning Projects | [Various Tutorials & Personal Study](#)

Ongoing

- Built multiple guided and independent projects: YouTube clone, weather app, to-do list, and other web applications.
- Strengthened skills in React state management, API integration, component architecture, and deployment.

EDUCATION

B.Sc. Mechatronics Engineering | [Addis Ababa Science and Technology University](#) 2021 – 2026 (Expected)

- Graduated student with a strong multidisciplinary foundation covering control systems, embedded systems, and software engineering.
- Active member of the Google Developer Student Clubs (GDSC) — Frontend Developer & Team Leader.

Preparatory & High School — Natural Science Stream

Debreselam St. Mary School, Gondar, Ethiopia

Programming Fundamentals Nanodegree

Udacity — Verified Certificate of Completion · Python, Problem-Solving, Algorithmic Thinking

Machine Learning Course

Completed a machine learning course covering supervised learning, CNNs, and transfer learning techniques.
